"Being recycled doesn't mean I lack quality"

Today we live in an environmentally conscious economy where demand for products with improved environmental performance is at an all time high. With awareness in these issues increasing, s:line have designed s:l to demonstrate green credentials through the careful construction of the riveted picture frame exterior.

In a busy working office, units can inevitably be knocked into and damaged. With this in mind the s:l carcass has been carefully designed to allow the damaged panel to be replaced, eliminating the need to replace the entire unit.

When the product ultimately reaches end of life the s:l design also allows for the product to be easily re-introduced into the recycling process.

"Transformation in 6 minutes"

The core focus of s:l is to provide choice and changeability. Whether you are altering your filing system, changing your office colours or simply wishing you had a drawer instead of a door

Our systems range is fully interchangeable; allowing variety and modification

You can convert your s:l unit in minutes, maintaining the same outer shell. Transformation of the fitments alone gives you a brand new unit in quick and simple steps

The heart of s:l is choice and functionality. s:l offers a multitude of filing options, designed for every occasion.

The culmination of all your storage solutions in one range; flippers, doors, drawers and tambours give choice and flexibility to capture space with an aesthetically pleasing finish.

Interchangeable storage options, including drawers, shelving, and roll out filing

Excellent storage options, with easy to modify shelf heights, perfect for a busy office

Easily accessible, soft-sliding drawers customised for accessibility

" I will be here long after everything else "

s:l range

The striking energetic design of s:l extends from the exterior through to the interior. Balanced lines and clean surfaces create an impression of elegance and stability, enhanced by top craftsmanship.

A truly engineered system, s:l provides a strengthened bottom plinth for use as a filing base to maximise storage capacity. Remaining true to s:l's ethos, the anti tilt provides a quality feel and extra stability on both drawers and roll out filing.

The levelling system allows effortless solutions for safety and stability within the office environment.

You can experience the quality on every closing of a door or drawer. You can notice it on every detail of the architecture.

You can see it in the design and the styling. s:l is confirmation of our commitment to providing leading edge storage design for every office environment.

"I am built to be fully secure at all times"

h:d range

Part of the s:l family, h:d has a style that opens up a multitude of opportunities featuring the highest of security attributes. For maximum security, each closure within the h:d unit is individually locked with a unique key.

The fully enclosed back on the drawers and security plates within each closure, ensures safe storage of documents for complete filing security. Whether you are filing confidential departmental files or private client documentation h:d will lock away your paperwork, laptop or personal belongings leaving an elegant and styled exterior.

h:d can be suited in with s:l, matching both the footprint and the 20, 30 & 40 pitch height options; providing a further extension of choice within the s:line family.

Personal suspension filing, or a departmental resource: the h:d range combines the functionality of a pedestal, a filing cabinet, a side filer and a cupboard; all in one range.

To maximise filing and storage capacity all units contain a strengthened base plinth. The reinforced base makes h:d an ideal unit for personal storage, utilising every part of the unit.

Variety of door heights within the range allows the h:d storage system to be used as a single closure or combination unit. All closures house their own locks for secure departmental filing.

G3
RANGE

benchmark
RANGE

" I am a great extension to your desking configuration, allowing segregation of departments without the need for partitioning "

G3 RANGE

Bookcase combination units are the perfect choice for non confidential or shared re-source filing, ideal for use in an open office environment.

The option of a lockable Side Tambour Unit ensures your personal unit can be used for your confidential and storage requirements.

after

" I will save you 30% extra space in your office "

BENCHMARK RANGE

Positioned at the end of a bench desk system, benchmark allows personalised secure storage and filing for each individual.

By replacing each personnel's pedestal with one benchmark unit located at the end of your bench desk, benchmark allows a more comfortable working environment.

This provides more working space, or the opportunity to increase the capacity of staff members around your bench desk

before

IGT

RANGE

IGT - IMAGE GRAPHIC TAMBOUR

An innovation in tambour design: IGT is the Graphic Tambour range that allows any digital image, graphic or logo* to be transferred, using high quality materials, to your tambour door units. The results are spectacular, taking the finished product beyond the realms of the imagination.

Whether it be Wall Art, Front of House Branding, a reference source or simply an image that adds that feel good factor to the office. IGT can completely transform any office space enhancing the harmony and environment.

The IGT range enhances your office atmosphere, it injects enthusiasm and has been known to create an air of relaxation and peace; quite an achievement from a storage system.

Simply supply your own photography, company logo or illustration in a digital format* and let us apply it to any s:l or m:line tambour blind. Graphics are printed with the latest digital print technology using durable and environmentally friendly UV inks. Professional colour management ensures accurate and vibrant colour saturation.

* graphics, images and logo's can be reproduced CMYK only, no metallic & spot colour artwork can be accepted.

A light green Sky:line filing cabinet is positioned in a lush, sun-dappled jungle. The cabinet is open, revealing two shelves filled with blue and red ring-bound folders. A vibrant, multi-colored lizard is perched on the top edge of the cabinet. The background is filled with tall trees and dense foliage, creating a natural and serene environment.

" I adapt to fit perfectly with your environment "

skyline range

Simple and stylish, striking and versatile. Sky:line is designed to enhance your office visually and functionally. Sky:line capitalises on the desk and storage area with efficient filing locked inside a contemporary finish.

The choice of s:line's characteristic handle detail, or Sky:line's handle design options presents style and function to visually unite your storage with your office surroundings.

The refined exterior opens up to a multitude of internal embellishments to allow all your essentials

to remain in close proximity to your workspace.

With the unique option of a slender shelf for increased on shelf filing capacity, or the multi purpose shelf for dual purpose filing, Sky:line provides you with the solution for your filing and storage needs under one footprint.

Additional options are available from pen pots to pin boards and letter trays to magnetic whiteboards. These options enhance the functionality of your Sky:line unit, allowing them to be tailored to suit any environment.

s:line pedestal

Ideal for personal storage, the s:line pedestal range is available in configurations of beam, under desk and desk high. All pedestals contain a pen tray and anti-tilt functionality as standard

Inspired by style and function the choice of handle designs suite in with your office providing a modern and stylish finish

The slimline pedestal is ideal for personal storage and sits comfortably under a beam desk configuration, providing a narrower footprint whilst still offering great versatility of storage

"The Beauty
in the
Details"
